EACim
European Academy of Ceramic Implantology

DUBAI BioHealth

23 & 24 Oct. 2026

DAY 1: Mövenpick Grand Plaza, Media City – Dubai
DAY 2: Total Core Academy. Sheikh Zayed Road, Dubai

Organized by: Total-Core ACADEMY ROZE BIO HEALTH

International Summit on Ceramic Implantology, Biological Dentistry & Regenerative Medicine

CME POINTS

HANDS-ON SESSION WITH IMPLANT SYSTEM

PRF HANDS-ON MASTERCLASS

Dr. Joseph Choukroun

Dr. David Roze

Dr. Daniel S. Oh

Dr. Jahida Al Jamal

Dr. Tobias Steinherr

Dr. Saurabh Gupta

INFORMATION & REGISTRATION

DUBAI BIOHEALTH & CERAMIC IMPLANTOLOGY SUMMIT 2026

DATES & VENUE

Dates: Friday-Saturday, 23–24 Oct. 2026 Venue:
Day 1: Mövenpick Grand Plaza – Media City, Dubai
Day 2: Total Core Academy – Sheikh Zayed Road, Dubai

INTRODUCTION & OVERVIEW

Dubai BioHealth 2026 is a landmark global gathering focused on biological dentistry, ceramic implantology, regenerative medicine, and integrative biohealth, bringing together leading clinicians, researchers, and industry innovators.

Dubai is the ideal setting due to its safety, innovation, and global accessibility.

EVENT HIGHLIGHTS

One day of scientific sessions, case presentations, panel discussions, and demonstrations. A full PRF Hands-On Masterclass led by
Dr. Joseph Choukroun.

A curated industry exhibition for brands leading in implantology, biomaterials, digital technology, and regenerative science.

EXPECTED ATTENDANCE

150–200 attendees, including oral surgeons, implantologists, biological dentistry practitioners, periodontists, prosthodontists, regenerative
academics, medicine specialists, trainees, and industry innovators.

ROZE
BIO HEALTH

REGISTRATION FEES

SCIENTIFIC SESSIONS:

Regular Rate: AED 799

HANDS-ON TRAINING:

IMPLANT SYSTEM WORKSHOP

PRF Masterclass with

Dr. Joseph Choukroun

Combined Fee: AED 3,000

Gala Dinner - AED 400

BIO HEALTH

CERAMIC IMPLANTOLOGY & BIOLOGICAL INTEGRATION:

PROGRAM OUTLINE

(23rd of Oct., Mövenpick Grand Plaza)

OFFICIAL OPENING

09:00 – 09:30	Registration & Welcome Coffee
09:30 – 09:45	Official Opening Ceremony Emirati Protocol & UAE National Anthem
09:45 – 10:00	Host Welcome Address **Dr. David Roze**

BIOLOGY, MEDICINE & CLINICAL INTEGRATION MORNING SCIENTIFIC SESSION

10:00 – 10:30	Regenerative Endodontic Protocol (REP) Biological Decison-Making **Dr. Jahida Al Jamal**
10:30 – 10:50	The Lifestyle Lever for Recovery, Longevity & Performance **Dr. Elie Abirached**
10:50 – 11:20	Functional Medicine and Implant Success: A Systemic Perspective **Dr. Mai Al Shamsi**
11:20 – 12:00	Keynote Lecture Ceramic Implantology: Current Evidence and Future Directions **Dr. Tobias Steinherr**
12:00 – 13:00	LUNCH BREAK & INDUSTRY EXHIBITION

ROZE
BIO HEALTH

CERAMIC IMPLANTOLOGY & BIOLOGICAL INTEGRATION:

PROGRAM OUTLINE
(23rd of Oct., Mövenpick Grand Plaza)

AFTERNOON SCIENTIFIC SESSION

13:00 – 13:30	Bone Graft Selection: Biological Principles vs Conventional Approaches **Dr. Daniel S. Oh**
13:30 – 14:00	Immediate Ceramic Implant Placement as a Biological Therapy concept: Integrating Regeneration and Aesthetics **Dr. med. dent. Christoph Weinbach**
14:00 – 14:40	The Preservation of Vitality is the New Axiom **Dr. François Lescuyer**
14:40 – 15:00	The Biology of Ceramic Implants: Evidence-Based Perspectives **Dr. Saurabh Gupta**
15:00 – 15:30	COFFEE BREAK
15:30 – 16:00	Ozone Therapy as a Biological Modulator in Regenerative and Implant Dentistry **Dr. Sameh Madkour**
16:00 – 17:00	Implant & Biohealth: The Immune Strategy to Improve Long Term Stability **Prof. Joseph (Y.) Choukroun**

CLOSING REMARKS

17:00 – 17: 15	Congress Chair: **Dr. David Roze**

IMPLANTS & BIOHEALTH: THE IMMUNE STRATEGY TO IMPROVE LONG TERM STABILITY

The ultimate course with the introduction of Osteoimmunology

By Dr. Joseph CHOUKROUN MD.

Learning PRF updates and predictable management of bone grafting & soft tissues

Since the first publication of PRF in 2001, our goal is to update continuously the PRF preparation and to widen its indication. The PRF OCEAN is the last 2026 update.
The recent introduction of the new bone science named Osteoimmunology highlights how the immune system controls bone formation and regulates bone loss. It also places the patient's health in the core of the rehabilitation strategy. The use of the inflammatory indexes calculated from the patient's biology will help to set a prognosis and to better predict the success of the surgery.

1/ Last updates of PRF: PRF "OCEAN"

Conditions of Blood Collection
PRF preparation with Pompac: Clot, membrane, patch, plugs, punched
Indications: Socket preservation, soft tissue improvement, sinus, bone grafting, immediate loading
PRF Ocean: Why and how the PRF is salted

2/ Guided open-wound healing with PRF: The solution with less stress

The new strategy for immediate implant after extraction & lack of soft tissues.

3/ Bone management in sockets & around implants. Bone grafting success

Osteo-immunology: How immune system controls bone formation and regulates bone resorption
Selection of biomaterials according to the immune response
How sticky bone helps faster bone formation
Influence of suture technique on soft tissue healing and wound closure
How to place implants in bone grafts and avoid bone loss after bone grafts

4/ Peri-Implantitis should be considered as an immune disease

Scientific rationale: Immune mechanisms & solutions to avoid bone loss around implants.

5/ Inflammatory indexes: Calculation at the time of consultation

The inflammatory indexes allow the surgeon to assess the patient's health which reflects the level of immune system: Calculation, use of the indexes to set a prognosis for the surgery outcome.
Presentation of the LINKOR: The device that allows the surgeon to make the blood tests and to get the results in the dental office with only 3 blood drops and in only 15 minutes.

6/ Demo: PRF Ocean preparation & Sticky Bone.

IMPLANTS & BIOHEALTH: THE IMMUNE STRATEGY TO IMPROVE LONG TERM STABILITY

PROGRAM OUTLINE

(24th of Oct., Total Core Academy)

8:30 – 13:30

Definition. PRF solid (Advanced PRF) & liquid (S-PRF & i-PRF)

Contents:
Preparation. Conditions to obtain the biggest clots Fibrin regeneration properties
Clinical indications and conditions of use.

Limits:
Use of i-PRF in TMJ & facial aesthetics

Osteoimmunology and applications in Oral surgery

How immune system controls the bone metabolism: Biology

How immune system becomes deficient: Systemic and local conditions of chronic inflammation

How to improve the immune system: Systemic & local strategies

Osteoimmunology and applications in Oral surgery

How sutures can induce local immune deficiency and bone loss

How implant placement can lead to local immune deficiency and bone loss

- In native bone
- In grafted bone

13:30 – 15:00

Why Peri-Implantitis has an Immune Origin

Prediction of the Surgery Outcome:
The use of inflammatory indices. Presentation of the LINKOR.

Demo. PRF Preparation & Sticky Bone

15:30 – 17:00

SDS Ceramic Implants
