Prof. Dr. Michael Ghalili

D.D.S., M.S.D.

Clinical Professor of Prosthodontics
and former director of Advanced Program
for International Restorative and Aesthetic Dentistry
New York University (NYU)

ACADEMIC APPOINTMENTS:

2004-2019: New York University College of Dentistry New York, New York
Director
Advanced Program for International Restorative and Aesthetic Dentistry

2001-2019: New York University College of Dentistry New York, New York
Clinical Professor Department of Prosthodontics

1986-1997: New York University College of Dentistry New York, New York
Clinical Associate Professor
Department of Fixed Prosthodontics and Occlusion

1979-1985: New York University College of Dentistry New York, New York
Assistant Professor and Coordinator for Fixed Prosthodontics Technique Section
Department of Fixed Prosthodontics

ACADEMIC HONORS AND AWARDS:

2008: Best Faculty Dean's award
2005: Best Faculty Dean's award
New York University College of Dentistry

EDUCATION:

Boston University School of Graduate Dentistry Boston, Massachusetts
Certification in Advanced Prosthodontics Masters of Science in Dentistry

New York University College of Dentistry New York, New York
Residency GPR
Advanced Education Program 1981

MEMBERSHIPS:

American Dental Association
New York County Dental Society

Clinical Cases

Learning Objectives

1st day :

How to transform their cosmetic patient base.

- Create proper treatment planning for cosmetic patients.
- Incorporate porcelain veneers in their daily practice of Dentistry.
- Using porcelain veneers for closing Diastemas, correcting minor malocclusion, crossbite, class three, tetracycline stains, short tooth syndrome, and other Aesthetic concerns.
- Learn how to select cases for no-prep and minimal-prep veneers.
- Shade selection and shade matching for porcelain veneers.
- Zirconium, E-Max, or full porcelain veneers, pros, and cons.

At the end of this day, the participants leave with a comprehensive knowledge of porcelain veneers, the importance of incorporating veneer restorations in the everyday practice of Dentistry, and the opportunity to grow their practices.

2nd day :

The participants will learn the following:

- Primary impression techniques for diagnostic wax up-prep guide, temporaries.
- Prep four or six anterior ivory teeth independently with supervision.
- Learn to fabricate prep guides.
- Fabricate temporary veneers on the model.
- Cementing independently or by observation of cementation of the anterior veneers.

At the end of this day, the participants will learn the ideal preparation for porcelain veneers, how to fabricate composite temporary veneers on the prepared teeth and how to cement the porcelain veneers, the best materials, and techniques to achieve the maximum aesthetic results.

Day 1 Seminar

Date: October 6th, 2023 (Friday)

Time	Subject
08:00 - 09:00	Registration
09:00 - 10:30	<p>A: Philosophy of Cosmetic Dentistry</p> <ul style="list-style-type: none"> • None orthodontic approach to restorative dentistry • Aesthetic Case selection • Aesthetic Case presentation • Documentation • Patient communication <p>B: Case Selection</p> <ul style="list-style-type: none"> • Diastema closure • Diagnostics wax up • Tissue regeneration technique • Veneer preparation options • Use of prep guides <p>C: Mastering Veneer Temporization</p> <ul style="list-style-type: none"> • Veneer temporalization • Temporary materials • Temporary cementation of veneers • Tissue adaptation • Polishing of temporary veneers
10:30 - 11:00	Coffee Break
11:00 - 12:30	<p>A: Indications for Veneer Restoration</p> <ul style="list-style-type: none"> • Solving the crowding with porcelain veneers • Veneer preparation in crowding cases • Impression techniques • Impression materials • Bite registration <p>B: Critical Occlusal Consideration</p> <ul style="list-style-type: none"> • Bite registration materials • Vertical Dimension records • How to deal with the loss of vertical in Aesthetic cases • Face bow or no face bow • Transfer of bite registration records to the lab <p>C: The Importance of Color in Dentistry</p> <ul style="list-style-type: none"> • Color selection • Hue, chroma and value • Different shade gui • Shade matching of veneers with full coverage restorations • How to transfer the shade information to the lab
12:30 - 14:00	Lunch Break

Day 1 Seminar

Date: October 6th, 2023 (Friday)

Time	Subject
14:00 - 15:30	<p>A: Laboratory Considerations</p> <ul style="list-style-type: none"> • Prescription writing to the lab • Chairside staining of the porcelain laminates • How to deal with the color mismatch • Thickness necessary for an ideal porcelain veneer • Ideal material used for porcelain veneers <p>B: Material Options for Veneers</p> <ul style="list-style-type: none"> • Emax veneers • Zirconium veneers • All porcelain veneers • Veneer cementation techniques • Veneer cementation materials <p>C: Occlusal Guards for Veneer Protection</p> <ul style="list-style-type: none"> • Porcelain veneer polishing materials • How to deal with sensitivities after cementation • Night guard or not?
15:30 - 16:00	Coffee Break
16:00 - 17:30	<p>A: Complications and Special Considerations</p> <ul style="list-style-type: none"> • Tetracycline stains and porcelain veneers • How to solve minor occlusal problems with porcelain veneers • Life of porcelain veneers • How to deal with porcelain veneers failures • Debonding, fracture of porcelain veneers, causes and solutions • Tissue adaptation to porcelain veneers <p>B: No-Prep Veneers</p> <ul style="list-style-type: none"> • No prep veneers • Minimum preparation veneers • Ideal materials for no prep veneers • Case selection for no prep veneers • No prep veneers vs prep veneers <p>C: Porcelain Veneer Maintenance</p> <ul style="list-style-type: none"> • Basic roles for maintenance of the veneer • Follow up on the veneer patients • Keys to the success of porcelain veneer restorations • Summery and conclusion of the course
17:30 - 18:00	Q & A

Day 2 Hands-On workshop

Date: October 7th, 2023 (Saturday)

Time	Subject
08:00 - 09:00	Registration
09:00 - 10:30	<p>A: Model Preparations</p> <ul style="list-style-type: none"> • Mannequin head placement • Teeth set up • Principle of tooth preparations • Required Armamentarium • Burr selection for veneer preparation <p>B: Veneer Preparation Techniques</p> <ul style="list-style-type: none"> • Primary impression for the provisional restorations • Veneer preparation of the two upper centrals • Veneer preparation of the two upper laterals • Veneer preparations of the two upper cupids • Final check of the preparations by the instructors <p>C: Impression Material Options and Techniques</p> <ul style="list-style-type: none"> • Discussion of rap around VS slice incisal reduction • Selection of impression materials for veneer cases • Retraction cord placement, • Tissue management prior to impression taking • Final impression of the six upper anterior teeth
10:30 - 11:00	Coffee Break
11:00 - 12:30	<p>A: Occlusal Considerations</p> <ul style="list-style-type: none"> • Bite registrations • Face bow • Pouring the impression • Dye selections • Articulation of the models <p>B: Temporization Materials and Techniques</p> <ul style="list-style-type: none"> • Temporization materials for veneer case • Fabrication of six upper anterior temporary veneers • Trimming of the temporary veneers • Polishing of the six anterior temporary veneers • Cementation materials for temporary veneers • Cementation of the six anterior veneers • Tissue adaptation of the temporary veneers • Cement removal • Occlusal adjustment of the temporary veneers <p>C: Color Matching and Special Considerations</p> <ul style="list-style-type: none"> • Porcelain veneers try in • Shade matching • Marginal checking • Bite checking • Tissue adaptation of the porcelain veneers

Day 2 Hands-On workshop

Date: October 7th, 2023 (Saturday)

Time	Subject
12:30 - 14:00	Lunch Break
14:00 - 15:30	<p>A: Final Cementation</p> <ul style="list-style-type: none"> • Overview of cements available for porcelain veneers • Cementation techniques • Final cementation of two upper centrals • Final cementation of two upper laterals • Final cementation of the two upper cuspids <p>B: Occlusal Consideration</p> <ul style="list-style-type: none"> • Occlusal adjustments of the final porcelain veneers • Marginal adaptations of the final porcelain veneers • Establishing the interproximal contacts for the final porcelain veneers • Removal of excess cements • Final checks of the finished porcelain veneers <p>C: Special Considerations of Veneer Materials and Patient Concerns</p> <ul style="list-style-type: none"> • Maintenance of porcelain veneers • Porcelain veneers VS composite veneers • Durability of porcelain veneers VS composite veneers • Laboratory considerations of porcelain veneers
15:30 - 16:00	Coffee Break
16:00 - 17:30	<p>A: Material Selection</p> <ul style="list-style-type: none"> • Choice of materials for porcelain veneers • Emax restorations • Zirconium restorations • Full porcelain jacket restorations • Composite veneer materials <p>B: Laboratory Procedure</p> <ul style="list-style-type: none"> • How to communicate with the laboratory • Picture taking techniques • Occlusal guard materials • Fabrication of the occlusal guard • Adjustment of the occlusal guard <p>C: Final Touches</p> <ul style="list-style-type: none"> • Patient communication tips • Patient follow up • Patient satisfaction survey • Establishing a recall system for porcelain veneer patients
17:30 - 18:00	Q & A
18:00 - 19:00	Certificate Award and Closing Ceremony
