Prof. Ziad **Salameh**
Program Chairperson

BDS, DESP, MSc, PhD

Prof. Salameh hold a Bachelor of Dental Surgery and a Master in Prosthodontics from the Faculty of Dental Medicine, Saint Joseph University, Beirut, Lebanon. He obtained a Master and a PhD in "Dental Materials and their Clinical Applications" from the Faculty of Dental Medicine, Siena University, Italy. Currently, he is a Professor of Prosthodontics and Director of the Center of Excellence in "3D Printing, Digitalization and Artificial Intelligence" at the Faculty of Dental Medicine, at the Lebanese University, Beirut, Lebanon.

Prof. Salameh topics of interest are dental materials, digital dentistry and esthetic rehabilitation. He has published more than 80 papers in peer-reviewed indexed journals. He is the Ambassador of the Digital Dentistry Society in Lebanon and key opinion leader for several international companies.

He has lectured regionally and internationally and conducted several seminars and workshops.

Dr. Carlos **Toro**

DDS, MSc

Dr. Carlos Toro is a Doctor of Dental Medicine (DDS) at the Central University of Venezuela (UCV) in 2008. He has a certificate in Dentomaxillofacial Imaging Interpretation at the Universidade Cidade São Paulo (UNICID) & University of Carabobo (UC) in 2010. He was working as a Professor of Dental Radiology at the Central University of Venezuela (2008-2018). He is author and tutor of research about use, interpretation and application of digital technologies on Dentistry. He is an Associate Founding Member of the Venezuelan Society of Dentomaxillofacial Radiology and Imaging (SVRID) 2012. He is a Certified Speaker of the Digital Dentistry Society (DDS). Also he is a visitor Professor of different Universities around the world. At the moment he a member of the Digital Design and the R&D Department of Viax Dental Technologies. He is the Director of the FirstFit Academy.

Dr. Nicolás **Veneri**

DDS, MSc

Dr. Nicolás Veneri studied Dentistry at the University Europea of Madrid (UEM). He has a Master in Surgery and Implantology at the "Virgen de la Paloma" Hospital. He also has a Bachelor in environmental Sciences and technologies with an speciality in Scientific Communication at the University Bicocca of Milan and University of Pavia (Italy). He is dedicated to Aesthetic Dentistry with a lot of experience in the WOW Effect of the FirstFit BioFunctional Mock-Up. At the moment he is a member of the FirstFit clinical and academy team and also is responsible of the FirstFit Accelerator Project. He is an Speaker of Digital Dentistry and new technologies on dentistry in USA, México, Colombia, Israel, France and Spain.

Dr. Achille **Peivandi**

DDS, Oral Surgeon, FICOI

- Specialized in oral surgery and periodontology from Claude Bernard University in Lyon.
- Holds an advanced certificate in anatomy and imaging.
- Postgraduate in implantology from Claude Bernard University in Lyon.
- Dr. Peivandi was an assistant professor in the department of periodontology at Claude Bernard University in Lyon and was responsible for anatomy and cadaver courses for a time period spanning 15 years.
- He is the founder and director of Intraclinic, where advanced postgraduate courses on implantology are held.
- Dr. Peivandi has over 20 years of clinical experience in private practice and was the head of the oral surgery unit in the maxillofacial department at Lyon north pole.
- Dr. Peivandi is an international speaker having given more than 100 national and international lecture
- **Active Member of Digital Dentistry Society (DDS)**
- **FirstFit International KOL**
- **Assistant Professor A.C. University of Genoa, Italy**
- **Active member of Academy of Osseointegration (AO)**

Dr. Patricia **Elías**

DDS, MSc

Dr. Patricia Elías Ortiz studied Dentistry at the University Europea of Madrid (UEM) 2012. She also completed studies at the Handicap Göteborg University Sweden & Plenido Dental School Barcelona. Her passion for aesthetics pushed her to studied Aesthetic Dentistry at the University Complutense of Madrid (UCM). She works with FirstFit digitally guided veneers technologies since 2015. She is the Clinical Director of FirstFit because at the moment she has more than 800 FirstFit clinical cases. She is dedicated to national and international training courses with live patient. Also she is member of the Viax Dental Technologies Research & Development Department (R&D).

01 Design

All our designs are based on a few photos and impressions (or scans) of your patient's teeth – no previous prep necessary.

We use the FirstFit software to generate an ideal smile design and, once approved, we outline preparations that bring your vision to life. FirstFit cases ensure a near-perfect correlation between smile design and final results.

The FirstFit Difference:

- Designs are fully customizable by the clinician.
- Smile designs that are functional and highly esthetic.
- Preparations are conservative and exactly match the digital plan.
- The variation between the design and the final results is less than the width of a human hair.

02 Preparation

FirstFit is the only system that allows you to prep-and-cement in a single highly efficient appointment. Use our SmartPrep guides to generate accurate preparations and selectively remove the minimum thickness necessary to achieve the results you desire.

The FirstFit Difference

- Prevent undercuts and over or under prepping to increase the durability of veneers.
- Easily contour preparations to match final restorations and avoid issues with the path of insertion.
- Create conservative preparations that remain on dental enamel to achieve a stronger bond.

03 Cementation

The OneStep delivery guide allows you to cement up to 10, single-arch veneers in a single movement.

Considerably reduce treatment time, simplify your workflow and eliminate any contingencies associated with traditional prep-and-placement techniques.

The FirstFit Difference:

- Simplify the conditioning of restorations.
- Eliminate the risk of misaligned units during the positioning process.
- Reduce treatment time by cementing restorations in a single movement.

SmartPrep Guide Design

SmartPrep guides are then designed to help you replicate the digital preparations in your patient's mouth. Their innovative design considerably diminishes your margin of error to less than the width of a sheet of paper.

OneStep Cementation Guide

The FirstFit Onestep cementation guide is pre-loaded with individual ceramic veneers, ideally positioned to be perfectly seated in your patient's mouth. Cement all unit in a single movement.

Printing SmartPrep Guide

SmartPrep guides are manufactured using the latest 3D printing technology as well as resistant, biocompatible materials. We adhere to the strictest quality control protocols to ensure the maximum accuracy of our cases.

FirstFit vs Traditional

	TRADITIONAL	FIRSTFIT
Average veneer case procedure time	minutes 480	minutes 90
Eliminates temporaries	X	✓
Maximum conservation of tooth structure	X	✓
Increased functional and aesthetic predictability	X	✓
Enhanced case acceptance and customer experience	X	✓

ADDITIONAL BENEFITS

	TRADITIONAL	FIRSTFIT
Feasibility analysis	X	✓
Smile design	X	✓
Biofunctional mockup	X	✓
Preparation guides	X	✓
Cementation guide	X	✓
Case specific burs	X	✓
Nightguard	X	✓
years warranty 3	X	✓

FirstFit ProWorkshop

FirstFit ProWorkshop is a theoretical-practical training course in aesthetics that summarizes during a 8 hour day, all the workflow to manage an specific clinic case with FirstFit Technology. The program is planned in work blocks that simulate the steps to follow with a patient under FirstFit Treatment. The Speakers will explain all the steps: diagnosis, photos, impressions or intraoral scans, digital mock-up, biofunctional mock-up, guided preparation and guided cementation. Also, the training course shows Live Patients and offer different Hands-On activities for the practical manage of the mostly important phases of the process: FirstFit Prep Guides Hands-On & Biofunctional Mock-Up Hands-On.

General Objective

Certify all the ProWorkshop training course participants for be able to work with a patient with FirstFit Technology, offering all the specific knowledge tools needed to successful management.

Specific Objectives

- Remember everything that is known about Veneers, Conventional Preparations, Materials and all the important factors to plan Veneer Cases.
- Define the concept of FirstFit Technology.
- Establish the FirstFit Workflow phases.
- Compare Conventional Workflow & FirstFit Workflow to manage aesthetic veneer cases.
- Make a Hands-On training of a Biofunctional Mock-Up.
- Make a Hands-On training of a FirstFit Prep Guides.
- Demonstrate through a live patient clinical case all the details for FirstFit management.
- Teach participants to sell Veneer Cases using the Biofunctional Mock-Up appointment.

09:00

| Morning

BLOCK I

09:00 - 10:30

What is FirstFit?

- Veneers on Dentistry.
- Generations for Prep Control.
- Key points.
- CAD/CAM Materials.
- IPR & TableTops.

10:30 - 11:45

| Coffee Break

10:45 - 12:00

FirstFit Live Patient Prep&Cem

- FirstFit Workflow with Live Patient.
- Photos, Video, Impressions, Intraoral Scans.
- Guided Prep & Guided Cementation.
- Indications.
- Clinical Cases.

12:00 - 14:00

| Lunch Break

14:00

| Afternoon

BLOCK II

14:00 - 15:30

FirstFit BioFunctional Mock-Up

- What is a Mock-Up?.
- FirstFit BioFunctional Mock-Up.
- Step by step.
- Mock-Up as a Marketing tool.
- Clinical cases.

15:30 - 15:45

| Coffee Break

15:45 - 16:45

Live Patient Mock-Up & WOW effect!

- Photos for FirstFit.
- Live Patient BioFunctional Mock-Up.
- WOW Effect!.
- How to value the Exoview?.
- Q&A.

16:45 - 17:00

Kahoot

Day 1

The Theory

Friday

Apr 19th

Training Program

08:00

| Morning

BLOCK III

09:00 - 10:30

FirstFit Hands-On

- FirstFit Web Platform.
- BioFunctional Mock-Up.
- FirstFit Prep Guides.

10:30 - 11:45 | Coffee Break

10:45 - 12:00

FirstFit Hands-On

- Try-in Veneers.
- Cementation Summary.
- Kahoot.

12:00 - 13:00 | Lunch Break

14:00

| Afternoon

BLOCK IV

14:00 - 15:30

FirstFit Hands-On

- FirstFit Web Platform.
- BioFunctional Mock-Up.
- FirstFit Prep Guides.

15:30 - 15:45 | Coffee Break

15:45 - 17:00

FirstFit Hands-On

- Try-in Veneers.
- Cementation Summary.
- Kahoot.

Day 2
The Practice

Saturday
Apr 20th

Training Program

FirstFit
Manufactured by Phibo

FirstFit ProWorkshop

What includes?

FirstFit ProWorkshop is an special training course to learn how to manage a patient with FirstFit Technologies. All the participants will have included:

- Theoretical content about the Veneers workflow with FirstFit technologies.
- Practical content with a Hands-On of:
 - BioFunctional Mock-Up.
 - FirstFit Prep Guides.
 - Veneers Try-In with the positioning and seating tray.
- Live patients:
 - BioFunctional Mock-Up.
 - Veneers guided preparations and Veneers guided placement and cementation.
- Morning Tea & Afternoon Tea.
- Lunch.
- Kahoot.
- Commercial Deals.
- FirstFit Clinical support to handle first cases.
- Participation Certificate of 8 hours.
